

高歪盖液位检测机

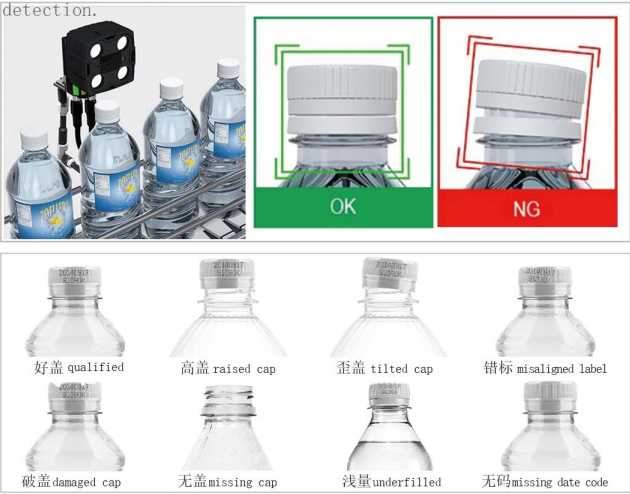

High crooked cap liquid level detection

适用范围 / Scope of application

适用于生产线各种类型的瓶、盖，灌装的高低液位、高盖、歪盖、无盖、安全环检测

Scope of application: Suitable for various types of bottles and caps in production lines, high and low filling levels, high caps, crooked caps, no caps, and safety ring detection.

本设备配置于灌装旋盖后段，用于对所有产品的品质进行检测，并将产品中的次品进行分拣并剔除：

This equipment is configured at the end of filling and capping, and is used to test the quality of all products. Sort and eliminate defective products from products:

封盖 capping

液位 liquid level

灌装高低液位 filling high and low liquid levels

旋盖质量缺陷 capping quality defects

功能及配置 / Function and configuration

- | | | |
|---------------------------------------|--|---|
| ① 高低液位检测 | ② 歪盖、无盖、安全环检测 | ③ 产品外观质量检测 |
| ④ 喷码检测 | ⑤ 标签检测 | ⑥ 塑封膜检测 |
| ① High and low liquid level detection | ② Crooked lid, no lid, safety ring detection | ③ Product appearance quality inspection |
| ④ Inkjet code detection | ⑤ Label detection | ⑥ Plastic film inspection |

技术参数 / Technical parameters

检测速度 Detection Speed	最大速度1500件/分 Max: 1500pcs/min
检测方式 Detection method	在线检测 Testing on the production line
检测类型 Detection type	视觉检测高歪盖、液位、标签、打码等 Visual inspection of high-skew caps, liquid levels, labels, coding
剔除方式 Culling method	推杆、气吹、拨杆式等 Push rod, air blow, lever type, etc.
机体材质 Body material	304不锈钢 304 stainless steel
